1.0 INTRODUCTION

1.1 OVERVIEW

The Healthcare Information Technology Standards Panel (HITSP) Immunization Message Component provides the capability to communicate an update to a patient's vaccination record. It is based upon the Centers for Disease Control (CDC) and Prevention Implementation Guide for Immunizations Data Transactions using Version 2.3.1 of the Health Level Seven (HL7) Standard Protocol Implementation Guide Version 2.2 June 20061.

1.2 COPYRIGHT PERMISSIONS

Excerpts from the Centers for Disease Control and Prevention Implementation Guide for Immunization Data Transactions using Version 2.3.1 of the Health Level Seven (HL7) Standard Protocol. Implementation Guide Version 2.2 are reproduced here with the assistance of the Centers for Disease Control and Prevention. This information is in the public domain and copies can be obtained at www.cdc.gov/vaccines.

1.3 REFERENCE DOCUMENTS

A list of key reference documents and background material is provided in the table below. HITSP maintained reference documents can be retrieved from the HITSP Web Site.

<table>
<thead>
<tr>

1.4 CONFORMANCE

This section describes the conformance criteria, which are objective statements of requirements that can be used to determine if a specific behavior, function, interface, or code set has been implemented correctly.

1.4.1 CONFORMANCE CRITERIA

In order to claim conformance to this construct specification, an implementation must satisfy all the requirements and mandatory statements listed in this specification, the associated HITSP Interoperability Specification or Capability, its associated construct specifications, as well as conformance criteria from the selected base and composite standards. A conformant system must also implement all of the required interfaces within the scope, subset or implementation option that is selected from the associated Interoperability Specification.

1 The CDC Implementation Guide addresses multiple vaccination related messages; this Component only utilizes the HL7 V2.3.1 Unsolicited Vaccination Record Update (VXU) message format
1.4.2 CONFORMANCE SCOPING, SUBSETTING AND OPTIONS

A HITSP Interoperability Specification or Capability must be implemented in its entirety for an implementation to claim conformance to the specification. HITSP may define the permissibility for interface scoping, subsetting or implementation options by which the specification may be implemented in a limited manner. Such scoping, subsetting and options may extend to associated constructs, such as this construct. This construct must implement all requirements within the selected scope, subset or options as defined in the associated Interoperability Specification or Capability to claim conformance.
2.0 COMPONENT DEFINITION

2.1 CONTEXT OVERVIEW

The text for the CDC Implementation Guide begins here:

This Guide is intended for use by immunization registries that want to participate in a strictly-defined record exchange agreement that limits the amount of optionality normally expected when using the HL7 standard. The Guide describes the most frequently used segments in their entirety, while giving a minimum description of segments containing only a few useful fields for registries. The Guide fully describes the fields within the segments used frequently by immunization registries, while the others are omitted in this document. With this limited scope, this Guide can in no way serve as a substitute for a thorough study of the entire set of HL7 specifications for electronic data interchange in health care environments.

The text for the CDC Implementation Guide ends here:

The Centers for Disease Control and Prevention Implementation Guide for Immunization Data Transactions using Version 2.3.1 of the Health Level Seven (HL7) Standard Protocol. Implementation Guide Version 2.2 June 2006 defines multiple transactions related to vaccination such as VXQ (Query for Vaccination Record), the VXR (Response to Vaccination Query Returning the Vaccination Record), the VXX (Response to Vaccination Query Returning Multiple PID Matches), and the VXU (Unsolicited Vaccination Record Update). This Component only specifies the use of VXU (Unsolicited Vaccination Record Update).

2.1.1 COMPONENT DEPENDENCIES

<table>
<thead>
<tr>
<th>Standard/HITSP Component</th>
<th>Depends On (Name of standard/HITSP Component that it depends on)</th>
<th>Dependency Type (Pre-condition, Post-condition, General)</th>
<th>Purpose (Reason for this dependency)</th>
</tr>
</thead>
<tbody>
<tr>
<td>HITSP/C72-Immunization Message</td>

<td>HITSP/C80 - Clinical Document and Message Terminology</td>
<td>General</td>
<td>Identifies vocabulary constrained by this Component to be applied within the exchange</td>
</tr>
</tbody>
</table>

2.2 RULES FOR IMPLEMENTING

Additional HITSP constraints as defined in Section 2.2.1 Data Mapping

---

2 See HITSP/C70 Immunization Query and Response for the use of the other messages specified by the Implementation Guide
2.2.1 DATA MAPPING

This section describes the specific data elements used by this Component. Due to the potentially large number of data elements in a particular standard, only the fields that HITSP is constraining differently from the standard will be described here.

For all constraints applied to the data the reader must refer to the Centers for Disease Control and Prevention Implementation Guide for Immunization Data Transactions using Version 2.3.1 of the Health Level Seven (HL7) Standard Protocol as well as the HITSP constraints defined in the tables below.

The format of Data Element entry in the table below is based upon the scheme of the Implementation Guide:

For example, PID 3.3.2.8 Sex indicates the following:

- **PID** = Patient Identification Segment
- 3.3.2.8 = references the section of the Implementation Guide
- Sex = the name of the data field

---

3.0 APPENDIX

No additional data at this time.
4.0 DOCUMENT UPDATES

4.1 DECEMBER 10, 2008

The changes in this construct address the following comments received during the Public Comment and Inspection Testing period (September 29 – October 24, 2008).

- 5557, 5589, and 5590

4.1.1 SECTION 2.2.1 DATA MAPPING

- Minor editorial changes were made to this table to correct typos
- Limit/Range of values column was updated with the appropriate references from HITSP/C80 Clinical Document and Message Terminology

4.1.2 SECTION 2.3.1 REGULATORY GUIDANCE

The following regulatory guidance standards were added:

- Family Educational Rights and Privacy Act (FERPA) Family Educational Rights
- HIPAA
- State and local regulatory guidance

4.2 DECEMBER 18, 2008

Upon approval by the HITSP Panel on December 18, 2008, this document is now Released for Implementation.

4.3 JUNE 30, 2009

Revised the document based on HITSP/TN903 Data Architecture

4.3.1 SECTION 2.2.1

- Updated Sex data element to reference HITSP/C80 vocabulary for V3 Administrative Gender

Minor editorial changes were made to this document. Removed boilerplate text for simplification. The term “actor” was replaced with “interface”.

4.4 JULY 8, 2009

Upon approval by the HITSP Panel on July 8, 2009, this document is now Released for Implementation.

4.5 SEPTEMBER 30, 2009

This document has been modified to reflect HITSP/TN903 Data Architecture approach.

The following changes have been made:

Section 1.3 - A list of key reference documents and background material is provided in the table below. HITSP-maintained reference documents can be retrieved from the HITSP Web Site.

- Table 1-1 Addition of TN903 as a reference
- Section 2.1 Table 2-1 and Table 2-2 update of Component Constraints and Dependencies
- Section 2.2 Formatted Message requirements to use numbered Message Constraints
- Section 2.2.1 Formatting of Message Data Mapping requirements Table 2-3 through Table 2-6 to use numbered Message Constraints
- Section 3.0 Addition of HITSP Constraints in this document as a reference
The following new Data Elements were identified and placed in the new HITSP/C154 Data Dictionary:

- 1.12 Mother’s Maiden Name
- 1.13 Multiple Birth Indicator
- 1.14 Birth Order
- 16.08 Immunization Services Funding Eligibility
- 13.11 Immunization Information Source

The following constraints were updated to match the HITSP/C154 Data Dictionary (based upon ARRA July 2009 work to harmonize data element constraints across Selected Standards):

- 2.01 Language constraint C154-[DE-2.01-2] Sign language

4.6 JANUARY 18, 2010

Changes based upon Public Comments:

- 7863, 8279

The full text of the comments along with the Technical Committee’s disposition can be reviewed on the HITSP Public Web Site.

Global correction to modify the Constraint IDs from “HITSP/C70” to “HITSP/C72”

The text related to Constraint ID C72-[MSG-2], does not need an Identifier, so the C70-[MSG-2] was deleted but the intent did not change.

Modified Constraint ID from C70-[ DE-4] to C72-[DE-13.08-1]

Deleted Appendix Section 3.1 HITSP Constraints in this Document as it is duplicate information already defined.

4.7 JANUARY 25, 2010

Upon approval by the HITSP Panel on January 25, 2010, this document is now Released for Implementation.
